Nyako Alain Karngong

Yaoundé, Cameroon, ✉alainnyako95@gmail.com ▯671307052

OBJECTIVE

A dedicated and self-motivated software engineer with 3 months of practical experience in developing and implementing software solutions. Seeking an opportunity to leverage my skills and knowledge to contribute to a dynamic team.

EXPERIENCE

Software Engineering Intern.
Vitna Media.

June 28 - August 28, 2023.

• Collaborated with a team of developers to design and implement new software features.
• Participated in code reviews and contributed to the improvement of existing codebase.
• Assisted in troubleshooting and debugging software issues.

PROJECTS

Car Rent

• A Car rental website to streamline the process of renting a vehicle for customers while providing a reliable and convenient platform for the rental company to manage inventory and bookings with user-friendly experience to provide an intuitive and easy-to-navigate interface for users to search for rental cars, view vehicle details, and make reservations using Html, CSS, JavaScript and MySQL.

- Comprehensive vehicle information to display detailed information about available cars, including model, features, pricing, and availability.
- Online booking and payment to enable users to seamlessly book their chosen vehicle online, select pick-up and drop-off locations, and make secure payments.
- Reservation management to allow users to manage their bookings, including modifying or canceling reservations if necessary.
- Customer support to offer customer support options such as live chat, email, or phone assistance for any inquiries or issues related to reservations or vehicle selection.
- Integration with location services to provide options for users to pick up and drop off vehicles at various locations.
